1. There is a new gear factory in the western outskirts of Saratov (51°33' N/
46°03' E), Saratov Oblast, northwest of an aircraft plant. [REDACTED] said that the construction of the plant had been started before the war but had been discontinued until the end of the war. The framework of the plant building, about 225x65 meters, was completed in 1948. As of December 1949, the glass roof was still under construction and the first machines were being installed in the workshop. At that time 200 to 250 dismantled German lathes, milling machines, and boring machines were still stored in the open air. Production had not started.

25X1C

25X1C2. It was learned [REDACTED] that the plant was being constructed under the program of the Five-Year-Plan and that the production of various gears was to be started in 1950.

25X1A * [REDACTED] Comment. A sketch provided by source but not disseminated located the plant about one kilometer northwest of the aircraft plant No 292, and north of the large arterial road, which runs from the freight station, passes north of aircraft plant No 292 and then continues on to the southwest. According to a German town map this road leads to Baltser (51°02' N/45°42' E). There is insufficient data to pinpoint the plant.
